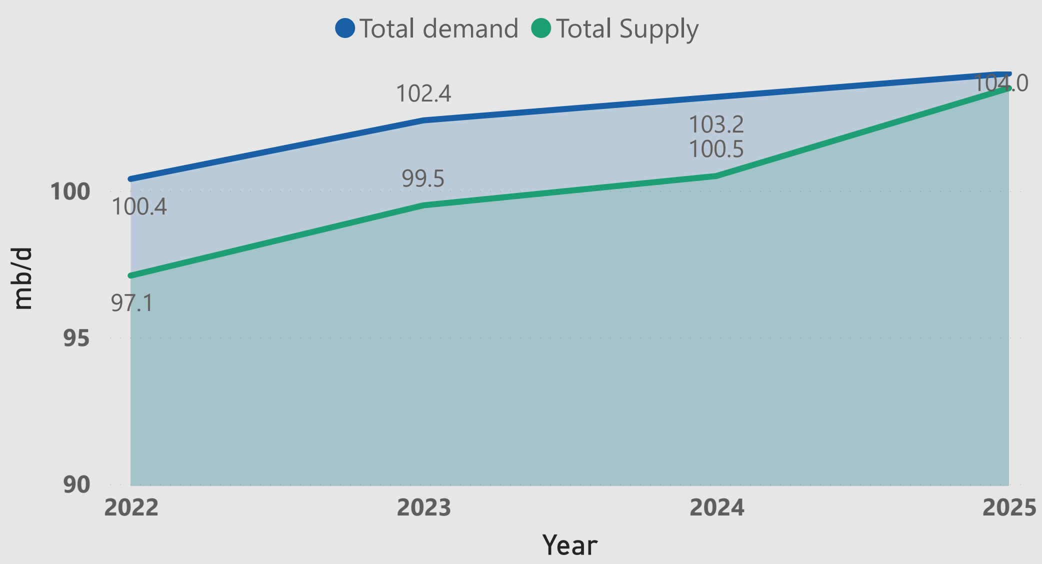
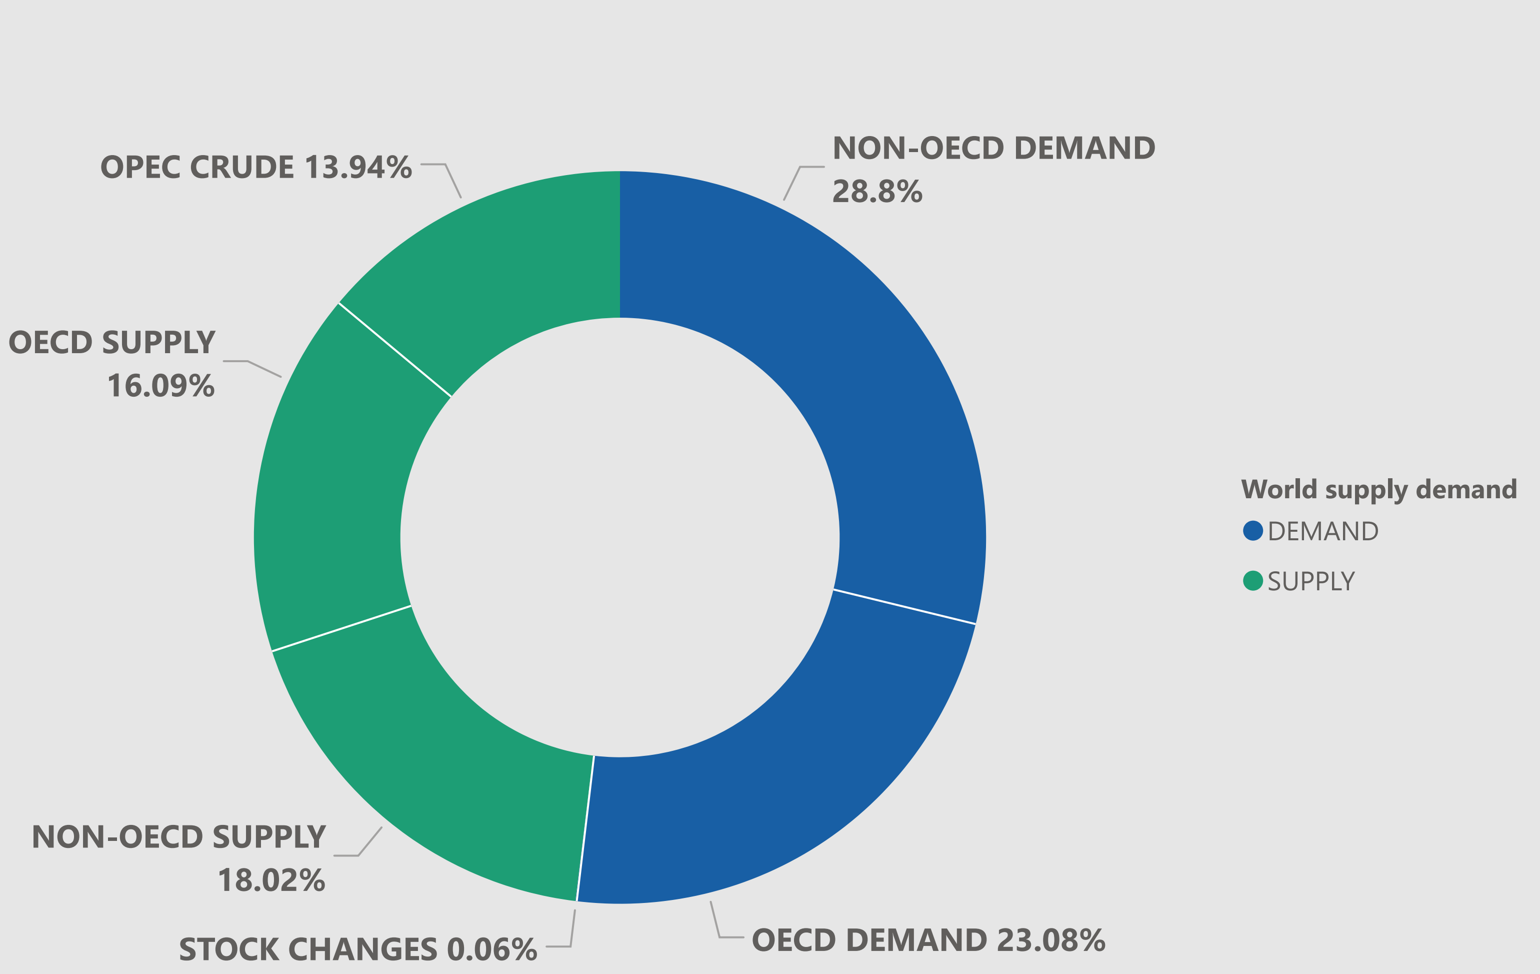
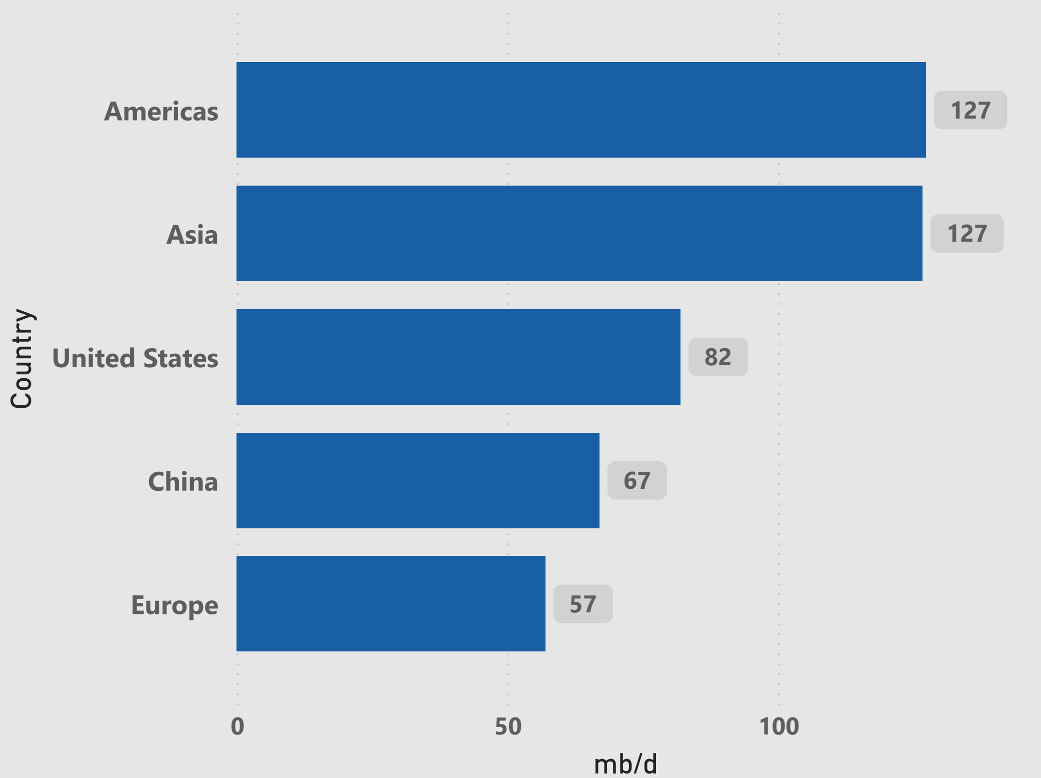
Global oil demand vs supply 2022–2025



Demand vs Supply by Category



Top 5 Demand Countries



Global oil demand reached 103.8 mb/d in 2024 — growing for the fourth consecutive year but at the slowest pace since 2020.

The market surplus of 2022 has steadily narrowed, and the Hormuz crisis of February 2026 marks the first major supply shock since the post-pandemic recovery.

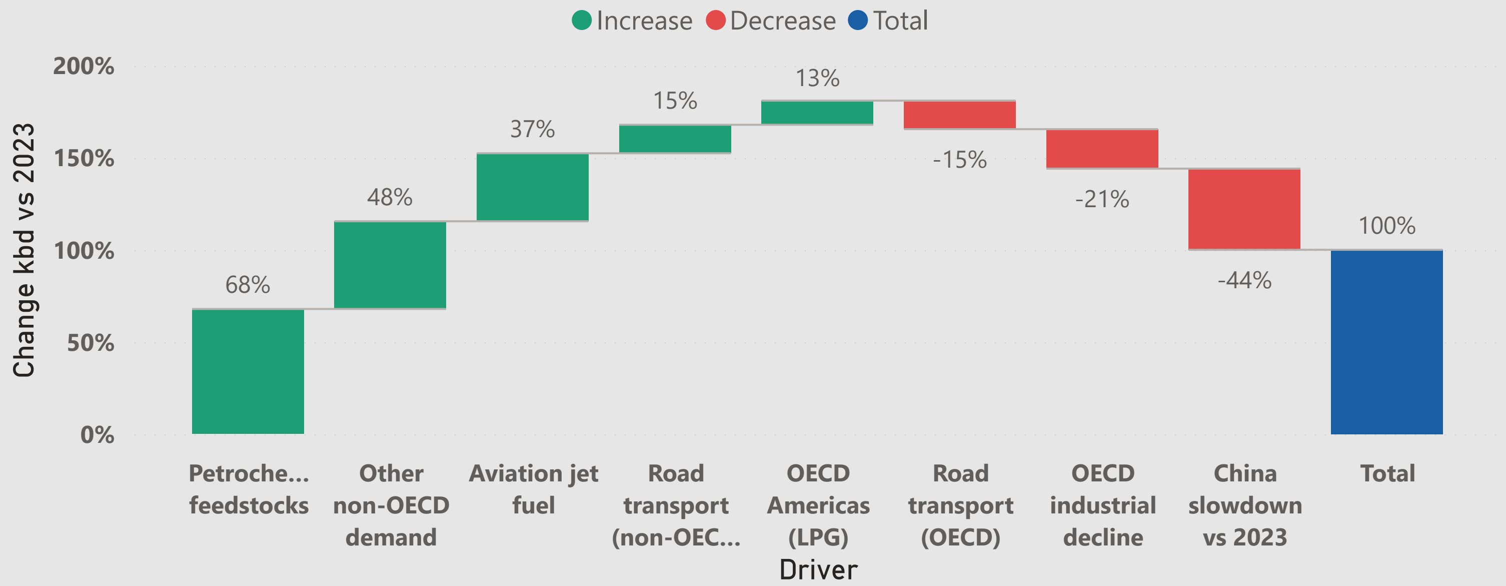
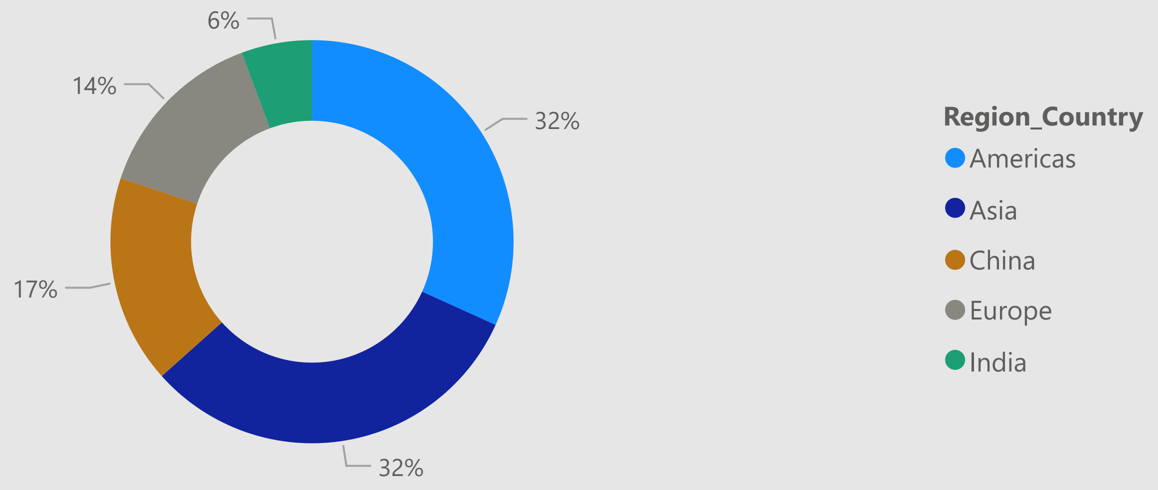
What drove oil demand growth in 2024 (kb/d vs 2023)

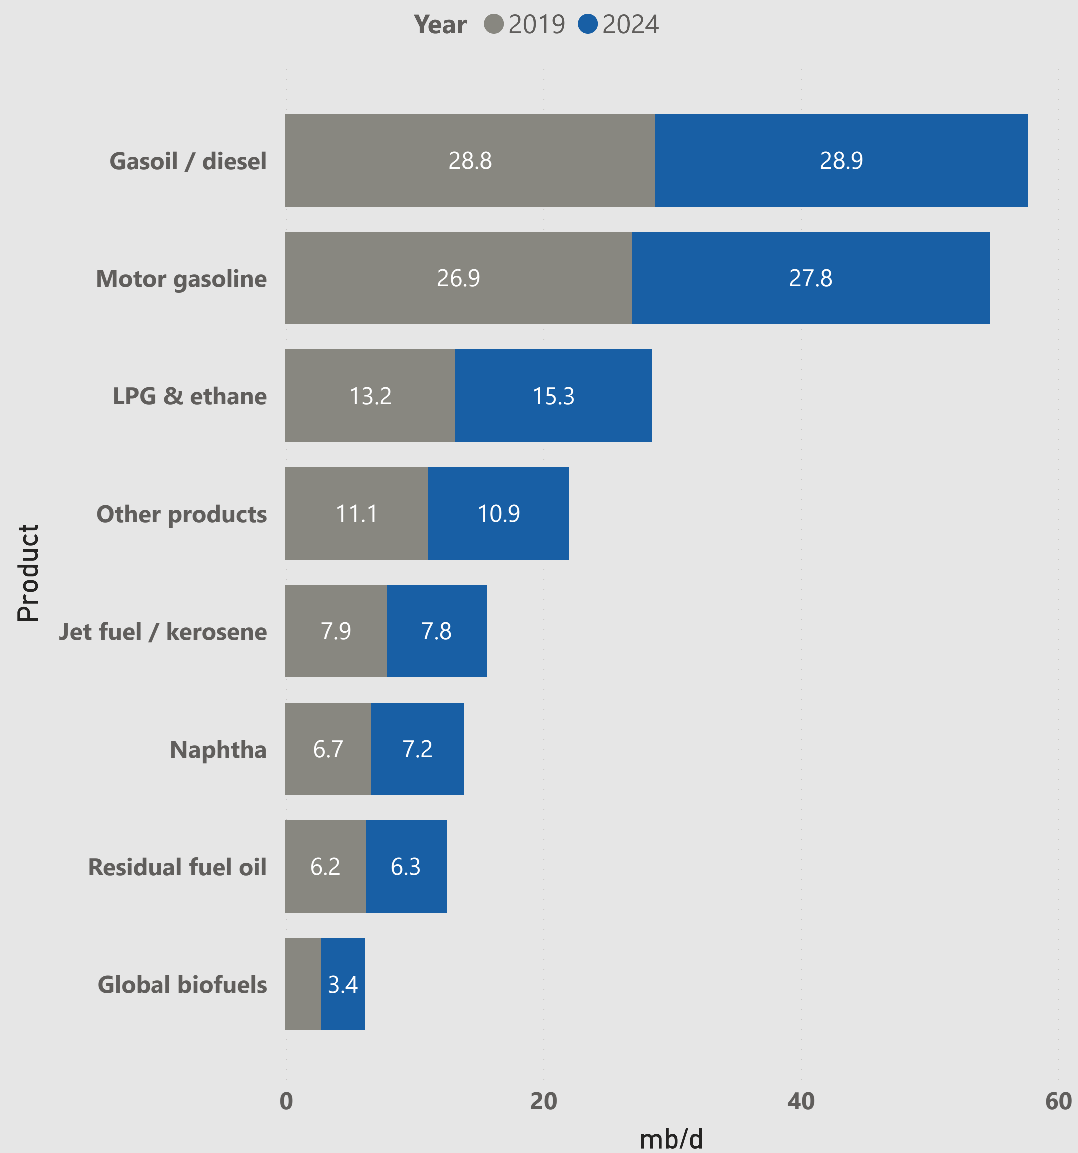


Petrochemical feedstocks accounted for 68% of 2024 demand growth as road transport stalled.

Oil demand by region 2023–2026 (mb/d)



Oil demand by product — 2019 vs 2024 (mb/d)



LPG & ethane grew from 13.2 to 15.3 mb/d (+16%). Naphtha from 6.7 to 7.2 mb/d (+7%). Motor gasoline barely moved. Gasoil flat. The petrochemical shift is immediately visible from bar lengths.

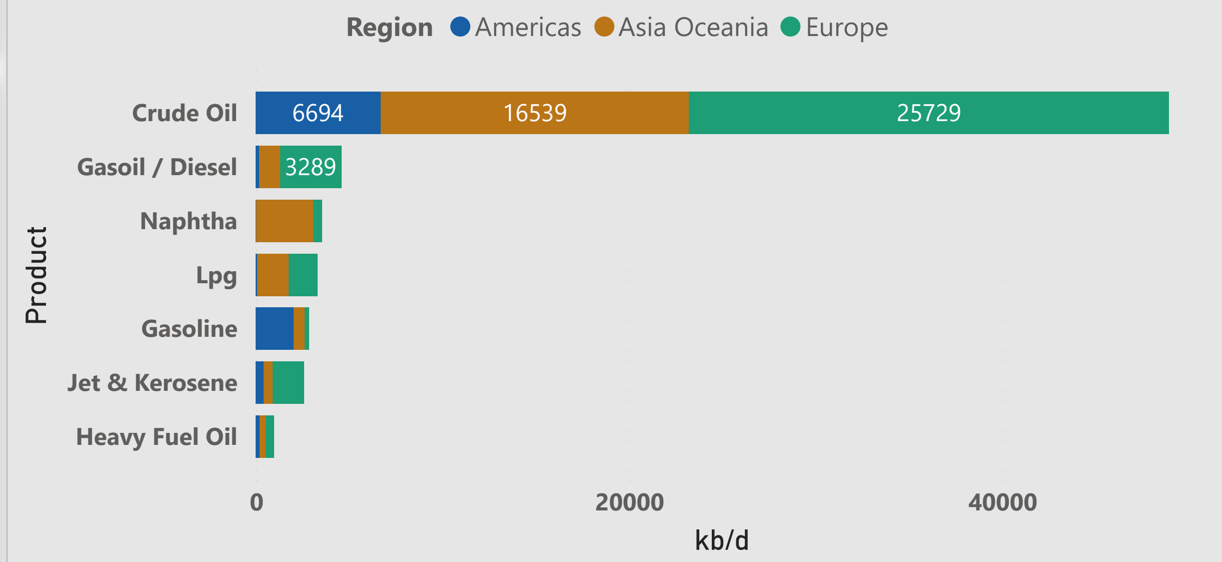
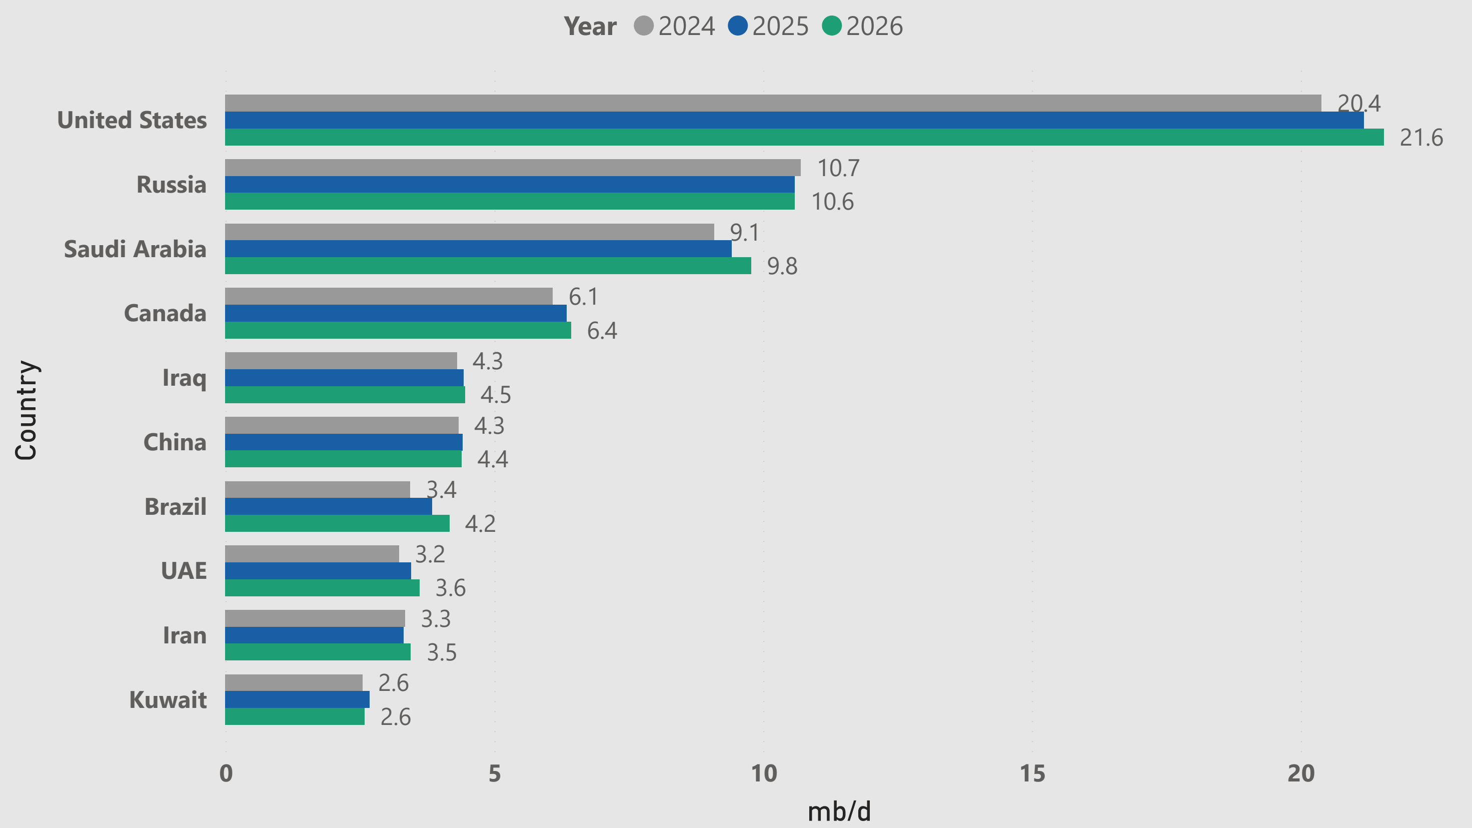
OECD oil imports by product and region (kb/d)



Top oil producers 2024–2026 (mb/d)



Crude oil dominates OECD imports at ~12,000+ kb/d. Europe is the largest OECD importer. This sets context for why a Hormuz disruption affecting Middle East crude flows hits Europe hardest.

Russian export revenue fell to $9.5bn in Feb 2026 — the lowest since the Ukraine invasion — as sanctions, price caps and the Hormuz disruption compounded.

Russian oil export revenue Jan 2025–Feb 2026 ($bn)

Hormuz crisis impact by product

Product	2025F (mb/d)	2026F (mb/d)	Crisis impact (kb/d)	Comments
Gasoil/diesel	28.93	29.05		Price impact reducing industrial use
Jet fuel/kerosene	7.76	7.88	-80	ME airport closures; rerouting
LPG & ethane	15.25	15.40	-170	Hormuz shut LPG flows; demand cut
Motor gasoline	27.79	27.91		Marginal impact
Naphtha	7.19	7.40	70	Naphtha substituting for lost LPG
Other products	10.91	10.88		Flat
Residual fuel oil	6.29	6.25		Structural decline continues

The Hormuz closure on Feb 28 2026 removed 8 mb/d from global supply - nearly 8% of the market. LPG flows from the Gulf fell sharply, cutting feedstock supply to Asian petrochemical plants and pushing Brent from $71 to $92 per barrel within two weeks.

The IEA agreed a 400 million barrel emergency stock release on March 11 to stabilize markets.
